SUMMARY

Full-stack developer specializing in AI-powered applications and backend systems. Engineered SmartCart AI, a production-ready eCommerce SaaS platform with semantic search, conversational AI, and microservices architecture using FastAPI, PostgreSQL, and Docker. Experienced in MERN stack development through an internship at SmartBridge, with a strong foundation in REST API design, cloud deployment, and JWT-based authentication. Actively seeking a software engineering role to architect and ship scalable, AI-driven products at production scale.

WORK EXPERIENCE

Full Stack Developer Intern (MERN)

May 2025 – Jul 2025

SmartBridge Educational Services Pvt. Ltd. | APSCHE Virtual

- Architected the **Online Complaint Management System**, a full-stack complaint management platform with 3 role-based portals (User, Agent, Admin) using React 18, Node.js, Express.js, and MongoDB, serving end-to-end lifecycle management for 3 user types.
- Engineered JWT-based authentication with role-based routing, directing users to dedicated dashboards and reducing unauthorized access to zero.
- Delivered 10+ REST APIs using Express.js and Mongoose covering complaint registration, assignment workflow, and real-time agent-user chat per complaint.
- Modeled 4 MongoDB collections (Users, Complaints, Assigned Complaints, Messages) supporting a complete complaint lifecycle across all user roles.

Web Technologies Intern

May 2024 – Jul 2024

APT IT Solutions | APSCHE, Hyderabad, AP

- Delivered a **Task Management System** end-to-end — from requirements gathering and UI design to backend development and deployment — within a 2-month timeline.
- Streamlined task management through automated status updates and real-time progress monitoring across the full project lifecycle.
- Optimized frontend performance using HTML5, CSS3, and JavaScript with DOM manipulation and form validation, achieving consistent cross-browser compatibility.

PROJECTS

SmartCart AI | FastAPI, PostgreSQL, Redis, Docker, OpenAI/Gemini APIs, JWT

Jan 2026 – Present

- Engineered a production-ready AI-powered eCommerce SaaS assistant handling end-to-end product discovery and conversational shopping for **500+ concurrent sessions**.
- Implemented semantic product search using Sentence-Transformers embeddings and PostgreSQL full-text search, improving search relevance by **40%** over keyword-only search.
- Architected scalable REST APIs with JWT authentication, Redis caching, and pagination, reducing average API response time to **under 200ms**.
- Integrated OpenAI/Gemini APIs for conversational AI assistance, delivering intelligent personalized product recommendations and context-aware shopping interactions.
- Containerized the full stack with Docker Compose (PostgreSQL + Redis), enabling one-command local and production deployment with zero manual configuration.
- github.com/Rajeshpaul4654/smartcart-ai

AI Assistant | Python, AI APIs, Git

Aug 2025 – Oct 2025

- Automated 5+ routine task workflows by integrating external AI APIs into a Python-based virtual assistant, cutting manual execution time significantly.
- Optimized system extensibility through a modular architecture, enabling new capabilities to be added without refactoring core logic.
- github.com/Rajeshpaul4654/assistant-ai

EDUCATION

St. Ann’s College of Engineering & Technology <i>B.Tech in Computer Science & Engineering (Cybersecurity) GPA: 7.54 / 10.0</i> Relevant Coursework: Data Structures & Algorithms, Network Security, Database Management Systems, Cloud Computing, Operating Systems	Chirala, AP 2022 – 2026 (<i>Expected</i>)
Sri Gowthami Junior College <i>Intermediate (MPC) GPA: 7.1 / 10.0</i>	Chirala, AP 2020 – 2022
ZPG High School <i>SSC (Secondary School Certificate) GPA: 8.1 / 10.0</i>	Chirala, AP 2020

TECHNICAL SKILLS

Languages: Python, JavaScript Frontend: React.js, HTML5, CSS3, Bootstrap 5 Backend: FastAPI, Node.js, Express.js, REST APIs, Microservices Databases & Cache: PostgreSQL, MongoDB, Redis DevOps & Tools: Docker, Docker Compose, Git, GitHub, VS Code AI & ML: OpenAI API, Gemini API, Sentence-Transformers, Semantic Search, LangChain (familiar) Security: JWT Authentication, Cybersecurity Fundamentals, bcrypt
